Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on November 30, 2005 has been entered.
2. The following is an examiner's statement of reasons for allowance: The prior art does not teach the automated setting-up of an injection molding machine including generating a substantially uniform velocity profile and setting the initial packing pressure to the minimal machine value, and manufacturing a part and inspecting for flash or short shot. The injection stroke is increased or reduced for each repeat manufacturing of a part until no effect or substantially no further effect to the flash and short shot. Then, the injection velocity is increased or reduced for each repeat manufacturing of a part until no effect or substantially no further effect to the flash and short shot. Or, the injection velocity is increased or reduced for each repeat manufacturing of a part until no effect or substantially no further effect to the flash and short shot. Then, the injection stroke is increased or reduced for each repeat manufacturing of a part until no effect or substantially no further effect to the flash and short shot. The inclusion of the uniform velocity profile and the minimal initial packing pressure emphasis that the steps are during the setting-up of the injection molding machine.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
